2007 KANSAS SOYBEAN COUNTY ESTIMATES

SPECIAL PRESS RELEASE

Released: March 12, 2008

Kansas Department of Agriculture U.S. Department of Agriculture P.O. Box 3534 Topeka, Kansas 66601-3534

Phone: 785-233-2230

PRODUCTION DOWN 15 PERCENT

Planted acreage, at 2.60 million, was down 550,000 acres from last year. Harvested acreage, at 2.55 million, was 530,000 acres lower than the 2006 number. Production totaled 84.15 million bushels, 15 percent below last year. The average yield for the State was 33 bushels per acre, up 1 bushel from 2006.

Planting progressed well behind last year and the 5-year average all spring with 57% planted on June 3rd compared to 75% last year and 71% for the 5 year average. The State received scattered showers during most of July and August but temperatures were hot throughout both months. By the end of the July, 72% of the crop was blooming and 34% was setting pods. However, by the end of August, 94% of the crop was setting pods and 17% was dropping leaves. Topsoil moisture was 10% very short, 38% short, 51% adequate, and 1% surplus at that time. As of October 1, 61 percent of the crop was rated as good to excellent condition and 11 percent had been harvested. Harvest picked up during November and moved ahead of both the 5 year

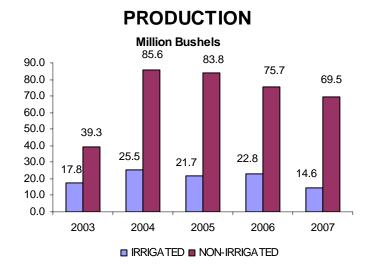

average and last year. As of November 11, 95 percent of the crop had been harvested compared to 89 percent for the five year average.

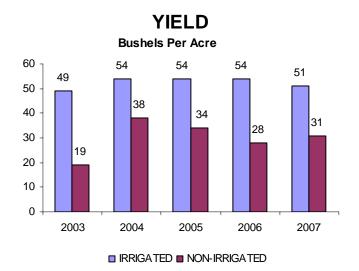

<u>County Production</u>: Brown County recorded the highest production in 2007, with 4.77 million bushels. The second and third leading counties were Marshall, with 4.43 million bushels, and Nemaha with 3.63 million bushels.

<u>County Harvested Acreage</u>: Marshall County had the largest harvested acreage, at 111,300 acres. Brown County ranked second, with 96,100 acres, followed by Cherokee County with 86,200 acres.

<u>County All Yield</u>: In 2007, Sherman County had the highest yield with an average of 61 bushels per acre. Meade and Sheridan Counties finished tied for second with an average yield of 59 bushels. Finney County came in fourth with an average of 55 bushels per acre.

NOTE: The County Estimates are also available on the Internet at http://www.nass.usda.gov/.
